Printed in Great Britain

Contents for Volume 145

Number 1, 9 July 1990

Benhamou, S., Sauvé, J.-P. and Bovet, P., Spatial Memory in Large Scale Movements: Efficiency and Limitation of the Egocentric Coding Process 1

Heschl, A., $L = C$ A Simple Equation with Astonishing Consequences 13

Frank, S. A., When to Copy or Avoid an Opponent's Strategy . . 41

Havsteen, B. H. and Varón, R., Kinetics of the Classical Complement Activation Cascade 47

Nicholson, D., Zara, S. J., Parsonage, N. G. and Barber, J., Lattice Model Simulations of the Stacking/Unstacking Behaviour in Thylakoid Membranes 65

Crawford, V. P., Nash Equilibrium and Evolutionary Stability in Large- and Finite-Population "Playing the Field" Models 83

Stein, W. D. and Stein, A. D., Testing and Characterizing the Two-stage Model of Carcinogenesis for a Wide Range of Human Cancers . 95

Varón, R., Havsteen, B. H., Vázquez, A., García, M., Valero, E. and García Cánovas, F., Kinetics of the Trypsinogen Activation by Enterokinase and Trypsin 123

Letters to the Editor

Kypr, J., Resistance of Native Protein Shapes to Random Single Point Mutations in their Genes 133

Morel, J. E. and Bachouchi, N., Movement of Actin Filaments Along Tracks of Myosin Heads 135

Érdi, P. and Tóth, J., What is and What is not Stated by the May–Wigner theorem? 137

Errata 141

Number 2, 24 July 1990

Malhotra, A. and Sadana, A., Role of the Initial State Distribution on First-order Deactivation of Microheterogeneous Enzyme Samples . 143

Godfray, H. C. J. and Harper, A. B., The Evolution of Brood Reduction by Siblicide in Birds 163

STILLMAN, R. A. and SUTHERLAND, W. J., The Optimal Search Path in a Patchy Environment 177

LAMOTTE-BRASSEUR, J., DIVE, G., DEHARENG, D. and GHUYSEN, J.-M., Electrostatic Potential Maps at the Quantum Chemistry Level of the Active Sites of the Serine Peptidases, α-Chymotrypsin and Subtilism . . 183

CRAWFORD, J. W. and YOUNG, I. M., A Multiple Scaled Fractal Tree . 199

CHOWDHURY, D., STAUFFER, D. and CHOUDARY, P. V., A Unified Discrete Model of Immune Response 207

GLASS, L. and MALTA, C. P., Chaos in Multi-looped Negative Feedback Systems 217

ZENG, W.-Z., COURTEMANCHE, M., SEHN, L., SHRIER, A. and GLASS, L., Theoretical Computation of Phase Locking in Embryonic Atrial Heart Cell Aggregates 225

MEGGS, W. J., Enhanced Polymerization of Polar Macromolecules by an Applied Electric Field with Application to Mitosis 245

ROBINSON, D., Phosphorus Availability and Cortical Senescence in Cereal Roots 257

BRAND, M. D., The Contribution of the Leak of Protons Across the Mitochondrial Inner Membrane to Standard Metabolic Rate . . 267

Number 3, 9 August 1990

LICHTSTEIN, D. and ATLAN, H., The "Cellular State": The Way to Regain Specificity and Diversity in Hormone Action 287

REINITZ, J. and VAISNYS, J. R., Theoretical and Experimental Analysis of the Phage Lambda Genetic Switch Implies Missing Levels of Co-operativity 295

CRESSMAN, R., Strong Stability and Density-dependent Evolutionarily Stable Strategies 319

BOYD, R. and RICHERSON, P. J., Group Selection among Alternative Evolutionarily Stable Strategies 331

POSSINGHAM, H. P. and HOUSTON, A. I., Optimal Patch Use by a Territorial Forager 343

WHITEHEAD, H., Rules for Roving Males 355

HUNDING, A., KAUFFMAN, S. A. and GOODWIN, B. C., *Drosophila* Segmentation: Supercomputer Simulation of Prepattern Hierarchy . . . 369

MCLEOD, K. J. and RUBIN, C. T., Frequency Specific Modulation of Bone Adaptation by Induced Electric Fields 385

CARDARELLI, N. F., The Role of a Thymus-Pineal Axis in an Immune Mechanism of Aging 397

GOW, A., WINZOR, D. J. and SMITH, R., Preferential Ligand Binding to Multi-state Acceptor Systems: the Unexplored Paradox of Acceptor Self-association that is Ligand-mediated but Detrimental to Ligand Binding 407

AOKI, I., Effects of Exercise and Chills on Entropy Production in Human Body 421

Number 4, 23 August 1990

FREEMAN, S., The Evolution of the Scrotum: A New Hypothesis . . 429

RAMADEVAN, S. and DEAKIN, M. A. B., The Gibbons Speciation Mechanism . 447

TSENG, S. and HSU, J.-P., A Comparison of the Parameter Estimating Procedures for the Michaelis–Menten Model 457

HOKKANEN, J. E. I., Temperature Regulation of Marine Mammals . . 465

WILLIAMS, J. M. and SLATER, P. J. B., Modelling Bird Song Dialects: the Influence of Reportoire Size and Numbers of Neighbours . . . 487

COMPER, W. D., Extracellular Matrix Interactions: Sulfation of Connective Tissue Polysaccharides Creates Macroion Binding Templates and Conditions for Dissipative Structure Formation 497

THIERRY, B., Feedback Loop between Kinship and Dominance: the Macaque Model 511

IIDA, Y., Quantification Analysis of 5′-Splice Signal Sequences in mRNA Precursors. Mutations in 5′-Splice Signal Sequence of Human β-Globin Gene and β-Thalassemia 523

BEANLAND, T. J., Evolutionary Relationships between "Q-type" Photosynthetic Reaction Centres: Hypothesis-testing using Parsimony . . 535

TOPHAM, C. M., A Generalized Theoretical Treatment of the Kinetics of an Enzyme-catalysed Reaction in the Presence of an Unstable Irreversible Modifier 547

Index to Volume 145

Acceptor systems, multi-state, preferential ligand binding to; the unexplored paradox of acceptor self-association that is ligand-mediated but detrimental to ligand binding, 407
Actin filaments, movement along tracks of myosin heads (letter), 135
Aging, the role of thymus–pineal axis in an immune mechanism of, 397
AOKI, I., Effects of exercise and chills on entropy production in human body, 421
ATLAN, H. (see LICHTSTEIN, D.), 287
Atrial heart cell aggregates, embryonic, theoretical computation of phase locking in, 225

BACHOUCHI, N. (see MOREL, J. E.), 135
BARBER, J. (see NICHOLSON, D.), 65
BEANLAND, T. J., Evolutionary relationships between "Q-type" photosynthetic reaction centres: hypothesis-testing using parsimony, 535
BENHAMOU, S., SAUVE, J.-P. and BOVET, P., Spatial memory in large scale movement: efficiency and limitation of the egocentric coding process, 1
Bird song dialect modelling: the influence of repertoire size and numbers of neighbours, 487
Birds, the evolution of brood reduction by siblicide in, 163
Bone adaptation, frequency specific modulation of, by induced electric fields, 385
BOVET, P. (see BENHAMOU, S.), 1
BOYD, R. and RICHERSON, P. J., Group selection among alternative evolutionarily stable strategies, 331
BRAND, M. D., The contribution of the leak of protons across the mitochondrial inner membrane to standard metabolic rate, 267
Brood reduction by siblicide in birds, the evolution of, 163

Carcinogenesis, testing and characterizing the two-stage model of, for a wide range of human cancers, 95
CARDARELLI, N. F., The role of a thymus–pineal axis in an immune mechanism of aging, 397
"Cellular state": the way to regain specificity and diversity in hormone action, 287
Cereal roots, phosphorus availability and cortical senescence in, 257
Chaos in multi-looped negative feedback systems, 217
Chills and exercise: effects on entropy production in human body, 421
CHOUDARY, P. V. (see CHOWDHURY, D.), 207
CHOWDHURY, D., STAUFFER, D. and CHOUDARY, P. V., A unified discrete model of immune response, 207
α-Chymotrypsin and subtilism, electrostatic potential maps at the quantum chemistry level of the active sites of, 183
Coding process, egocentric, efficiency and limitation of; spatial memory in large scale movements, 1
COMPER, W. D., Extracellular matrix interactions: sulfation of connective tissue polysaccharides creates macroion bonding templates and conditions for dissipative structure formation, 497
Complement activation cascade, kinetics of, 47
Co-operativity: missing levels are implied from theoretical and experimental analysis of the phage lambda genetic switch, 295
COURTEMANCHE, M. (see ZENG, W.-Z.), 225
CRAWFORD, J. W. and YOUNG, I. M., A multiple scaled fractal tree, 199
CRAWFORD, V. P., Nash equilibrium and evolutionary stability in large- and finite-population "playing the field" models, 83
CRESSMAN, R., Strong stability and density-dependent evolutionarily stable strategies, 319

Deactivation, first-order, of microheterogeneous enzyme samples, role of the initial state distribution on, 143
DEAKIN, M. A. B. (see RAMADEVAN, S.), 447
DEHARENG, D. (see LAMOTTE-BRASSEUR, J.), 183
Density-dependent evolutionarily stable strategies, strong stability and, 319
DIVE, G. (see LAMOTTE-BRASSEUR, J.), 183
Dominance and kinship, feedback loop between; the macaque model, 511
Drosophila segmentation: supercomputer simulation of prepattern hierarchy, 369

Electric field, enhanced polymerization of polar macromolecules by, with application to mitosis, 245
Electric fields, induced, frequency specific modulation of bone adaptation by, 385
Electrostatic potential maps at the quantum chemistry level of the active sites of the serine peptidases, α-chymotrypsin and subtilism, 183
Embryonic atrial heart cell aggregates, theoretical computation of phase locking in, 225
Enterokinase and trypsin, kinetics of the trypsinogen activation by, 123
Entropy production in human body, effects of exercise and chills on, 421
Environment, patchy, the optimal search path in, 177
Enzyme samples, mictoheterogeneous, role of the initial state distribution on first-order deactivation of, 143
Enzyme-catalysed reaction in the presence of an unstable irreversible modifier, a generalized theoretical treatment of the kinetics of, 547
ÉRDI, P. and TÓTH, J., What is and what is not stated by the May–Wigner theorem? (letter), 137
Evolution of brood reduction by siblicide in birds, 163
Evolution of the scrotum: a new hypothesis, 429
Evolutionary relationships between "Q-type" photosynthetic reaction centres: hypothesis-testing using parsimony, 535
Evolutionary stability in large- and finite-population "playing the field" models, Nash equilibrium and, 83
Evolutionarily stable strategies, alternative, group selection among, 331
Evolutionarily stable strategies, density-dependent, and strong stability, 319
Exercise and chills: effects on entropy production in human body, 421
Extracellular matrix interactions: sulfation of connective tissue polysaccharides creates macroion binding templates and conditions for dissipative structure formation, 497

Feedback loop between kinship and dominance: the macaque model, 511
Feedback systems, negative, multi-looped, chaos in, 217
Filaments, actin, movement along tracks of myosin heads (letter), 135
5′-splice signal sequence of human β-globin gene, mutations in, and β-thalassemia, 523
Forager, territorial, optimal patch use by, 343
Fractal tree, scaled, multiple, 199
FRANK, S. A., When to copy or avoid an opponent's strategy, 41
FREEMAN, S., The evolution of the scrotum: a new hypothesis, 429
Frequency specific modulation of bone adaptation by induced electric fields, 385

GARCÍA, M. (see VARÓN, R.), 123
GARCÍA CÁNOVAS, F. (see VARÓN, R.), 123
Gene, β-globin, human, mutations in 5′-splice signal sequence of, 523
Genes: resistance of native protein shapes to random single point mutations (letter), 133
Genetic switch, phage lambda; theoretical and experimental analysis implies missing levels of co-operativity, 295
GHUYSEN, J.-M. (see LAMOTTE-BRASSEUR, J.), 183
Gibbons speciation mechanism, 447

GLASS, L. and MALTA, C. P., Chaos in multi-looped negative feedback systems, 217
GLASS, L. (see ZENG, W.-Z.), 225
β-Globin gene, human, mutations in 5′-splice signal sequence of, 523
GODFRAY, H. C. J. and HARPER, A. B., The evolution of brood reduction by siblicide in birds, 163
GOODWIN, B. C. (see HUNDING, A.), 369
GOW, A., WINZOR, D. J. and SMITH, R., Preferential ligand binding to multi-state acceptor systems: the unexplored paradox of acceptor self-association that is ligand-mediated but detrimental to ligand binding, 407
Group selection among alternative evolutionarily stable strategies, 331

HARPER, A. B. (see GODFRAY, H. C. J.), 163
HAVSTEEN, B. H. and VARÓN, R., Kinetics of the classical complement activation cascade, 47
HAVSTEEN, B. H. (see VARÓN, R.), 123
Heart cell aggregates, atrial, embryonic, theoretical computation of phase locking in, 225
HESCHL, A., $L = C$ a simple equation with astonishing consequences, 13
HOKKANEN, J. E. I., Temperature regulation of marine mammals, 465
Hormone action, the "cellular state" way to regain specificity and diversity in, 287
HOUSTON, A. I. (see POSSINGHAM, H. P.), 343
HSU, J.-P. (see TSENG, S.), 457
Human body, effects of exercise and chills on entropy production in, 421
Human cancers, testing and characterizing the two-stage model of carcinogenesis for a wide range of, 95
Human β-globin gene, mutations in 5′-splice signal sequence of, 523
HUNDING, A., KAUFFMAN, S. A. and GOODWIN, B. C., *Drosophila* segmentation: supercomputer simulation of prepattern hierarchy, 369

IIDA, Y., Quantification analysis of 5′-splice signal sequences in mRNA precursors. Mutations in 5′-splice signal sequence of human β-globin gene and β-thalassemia, 523
Immune mechanism of aging, the role of a thymus-pineal axis in, 397
Immune response, a unified discrete model of, 207

KAUFFMAN, S. A. (see HUNDING, A.), 369
Kinetics of the classical complement activation cascade, 47
Kinship and dominance, feedback loop between; the macaque model, 511
Kinetics of an enzyme-catalysed reaction in the presence of an unstable irreversible modifier, a generalized theoretical treatment of, 547
Kinetics of the trypsinogen activation by enterokinase and trypsin, 123
KYPR, J., Resistance of native protein shapes to random single point mutations in their genes (letter), 133

$L = C$ a simple equation with astonishing consequences, 13
LAMOTTE-BRASSEUR, J., DIVE, G., DEHARENG, D. and GHUYSEN, J.-M., Electrostatic potential maps at the quantum chemistry level of the active sites of the serine peptidases, α-chymotrypsin and subtilism, 183
Lattice model simulations of the stacking/unstacking behaviour in thylakoid membranes, 65
LICHTSTEIN, D. and ATLAN, H., The "cellular state": the way to regain specificity and diversity in hormone action, 287
Ligand preferential binding to multi-state acceptor systems: the unexplored paradox of acceptor self-association that is ligand-mediated but detrimental to ligand binding, 407

Macaque model: feedback loop between kinship and dominance, 511
MCLEOD, K. J. and RUBIN, C. T., Frequency specific modulation of bone adaptation by induced electric fields, 385

Macromolecules, polar, enhanced polymerization of, by an applied electric field, with application to mitosis, 245
Males, roving, rules for, 355
MALHOTRA, A. and SADANA, A., Role of the initial state distribution on first-order deactivation of microheterogeneous enzyme samples, 143
MALTA, C. P. (see GLASS, L.), 217
Mammals, marine, temperature regulation of, 465
Marine mammals, temperature regulation of, 465
May–Wigner theorem, what is and what is not stated by? (letter), 137
MEGGS, W. J., Enhanced polymerization of polar macromolecules by an applied electric field with application to mitosis, 245
Membrane, inner, mirochondrial, the leak of protons across; contribution to standard metabolic rate, 267
Membranes, thylakoid, lattice model simulations of the stacking/unstacking behaviour in, 65
Memory, spatial, in large scale movements: efficiency and limitation of the egocentric coding process, 1
Metabolic rate, standard, the contribution of the leak of protons across the mitochondrial inner membrane to, 267
Michaelis–Menten model, a comparison of the parameter estimating procedures for, 457
Mitochondrial inner membrane, leak of protons across; contribution to standard metabolic rate, 267
Mitosis, enhanced polymerization of polar macromolecules by an applied electric field, with application to, 245
MOREL, J. E. and BACHOUCHI, N., Movement of actin filaments along tracks of myosin heads (letter), 135
Movement of actin filaments along tracks of myosin heads (letter), 135
Movements, large scale, spatial memory in; efficiency and limitation of the egocentric coding process, 1
mRNA precursors, quantification analysis of 5′-splice signal sequences in; mutations in 5′-splice signal sequence of human β-globin gene and β-thalassemia, 523
Mutations in 5′-splice signal sequence of human β-globin gene and β-thalassemia, 523
Mutations, single point, random, resistance of native protein shapes to, in their genes (letter), 133
Myosin heads, movement of actin filaments along tracks of (letter), 135

Nash equilibrium and evolutionary stability in large- and finite-population "playing the field" models, 83
Negative feedback systems, multi-looped, chaos in, 217
NICHOLSON, D., ZARA, S. J., PARSONAGE, N. G. and BARBER, J., Lattice model simulations of the stacking/unstacking behaviour in thylakoid membranes, 65

Opponent, when to copy or avoid strategy of, 41

PARSONAGE, N. G. (see NICHOLSON, D.), 65
Patch use, optimal, by a territorial forager, 343
Phage lambda genetic switch: theoretical and experimental analysis implies missing levels of co-operativity, 295
Phase locking in embryonic atrial heart cell aggregates, theoretical computation of, 225
Phosphorus availability and cortical senescence in cereal roots, 257
Photosynthetic reaction centres, "Q-type", evolutionary relationships between; hypothesis-testing using parsimony, 535
Pineal–thymus axis: role in an immune mechanism of aging, 397
"Playing the field" models, large- and finite-population, Nash equilibrium and evolutionary stability in, 83

Polymerization, enhanced, of polar macromolecules by an applied electric field with application to mitosis, 245
Polysaccharide, connective tissue, sulfation creates macroion binding templates and conditions for dissipative structure formation; extracellular matrix interactions, 497
POSSINGHAM, H. P. and HOUSTON, A. I., Optimal patch use by a territorial forager, 343
Protein shapes: resistance to random single point mutations in their genes (letter), 133
Proton leak across the mitochondrial inner membrane: contribution to standard metabolic rate, 267

RAMADEVAN, S. and DEAKIN, M. A. B., The Gibbons speciation mechanism, 447
Regulation, temperature, of marine mammals, 465
REINITZ, J. and VAISNYS, J. R., Theoretical and experimental analysis of the phage lambda genetic switch implies missing levels of co-operativity, 295
Resistance of native protein shapes to random single point mutations in their genes (letter), 133
RICHERSON, P. J. (see BOYD, R.), 331
ROBINSON, D., Phosphorus availability and cortical senescence in cereal roots, 257
Roots, cereal, phosphorus availability and cortical senescence in, 257
RUBIN, C. T. (see MCLEOD, K. J.), 385

SADANA, A. (see MALHOTRA, A.), 143
SAUVE, J.-P. (see BENHAMOU, S.), 1
Scrotum, evolution of; a new hypothesis, 429
Search path, optimal, in a patchy environment, 177
Segmentation, *Drosophila*; supercomputer simulation of prepattern hierarchy, 369
SEHN, L. (see ZENG, W.-Z.), 225
Selection, group, among alternative evolutionary stable strategies, 331
Senescence, cortical, in cereal roots, and phosphorus availability, 257
Serine peptidases, α-chymotrypsin and subtilism, electrostatic potential maps at the quantum chemistry level of the active sites of, 183
SHRIER, A. (see ZENG, W.-Z.), 225
Siblicide in birds, the evolution of brood reduction by, 163
SLATER, P. J. B. (see WILLIAMS, J. M.), 487
SMITH, R. (see GOW, A.), 407
Song dialects, bird, modelling of; influence of repertoire size and numbers of neighbours, 487
Speciation mechanism, Gibbons, 447
Stability, evolutionary, in large- and finite-population "playing the field" models, Nash equilibrium and, 83
Stability: group selection among alternative evolutionarily stable strategies, 331
Stability, strong, and density-dependent evolutionarily stable strategies, 319
Stacking/unstacking behaviour in thylakoid membranes, lattice model simulations of, 65
STAUFFER, D. (see CHOWDHURY, D.), 207
